

Research Activities

ODC center has been linking training closely with research by offering research opportunities on ocean modeling, regional climate prediction and ocean forecasting system development. Several selected early career professionals were provided with sponsorships and worked in the center. With a view to broadening early career professionals' scope of knowledge, ODC center has synergized its efforts with other relevant international programmes for interactions with the world's leading scientists. What's more, ODC center provides a solid technical support to several international cooperation projects, such as the Ocean Forecast Systems (OFS) and Monsoon Onset Monitoring and its Social and Ecosystem Impacts (MOMSEI).

Joint research on Sri Lanka Regional Ocean Modeling in 2017

Ocean Forecasting System for 21st Century Maritime Silk Road

Application of OFS in the Prediction of Sanchi Oil Spill in 2018

Joint research on ocean modeling and forecasting in Thai's waters in 2019

WESTPAC Training Workshop on Delivering Ocean Forecasting Services for Coral Reef Conservation in Phuket of Thailand in 2019

Global High Resolution Wave-Tide-Circulation Coupled Model
